

More ways to save. More ways to pay.

Get the right medication at the right price. And pay for it in the way that's right for you. At Express Scripts® Pharmacy, we are committed to providing affordable and flexible options to pay for your prescriptions.

Elevating care, lowering cost

- ✘ **Choose home delivery.** Customers who get 90-day supplies of maintenance medications delivered (with free standard shipping!) by Express Scripts® Pharmacy **save an average of 33%** on their prescriptions.¹
- ✘ **Choose generics.** Many medications have a less-expensive generic available that is just as effective. Use our “Price a Medication” tool to find lower-cost medication options.
- ✘ **Choose upfront savings.** Express Scripts® Pharmacy will automatically apply all eligible manufacturer coupons to your medications. You'll see the savings reflected in your final bill.

Pay your way

Pay automatically

Enroll in Autopay to set up an automatic payment every time a prescription ships. To protect you from paying more than you expected, you can even set a maximum amount we can charge your account or card. If a payment is over that amount, we will check with you before processing the payment.

Pay online

Conveniently pay for your prescriptions online with your debit card, credit card, checking account, or PayPal account.

Pay 3 monthly installments

Instead of paying for a prescription all at once, you can select to split the total cost into equal credit or debit card payments spread over three months (with no service fee). Your first installment payment will be processed when your medication ships.
