

BE A COMMUNITY OF IMMUNITY

**COVID-19 vaccines: Moving forward
so we can get back together.**

EVERNORTHSM

While vaccinations are key, information is critical.

We understand that not everyone is ready to jump on the vaccine train. To many, it seems like the vaccines happened overnight. Others have questions they need answered before getting the shot. And there are those who have trouble trusting it at all. That's why we're here—to help with education that will lead to vaccinations.

Your plan members are looking to you for guidance. [New research shows](#) **72% of Americans** trust their employer as the most believable source of information on a range of issues, including the pandemic.

+ MOTIVATE

Start small so we can move forward.

Education is step one to getting us back to the activities and people we miss. Step two is motivating your plan members to get vaccinated. Start small with your own member community and you can begin to see the ripple effect take hold. Every vaccination becomes inspiration for others to do the same. All in an effort to get our communities back—birthday parties, sporting events, neighborhood gatherings—all of the things we've been missing can be ours again. Here are some ideas to help you **Be a Community of Immunity.**

+ FACILITATE

Bring the vaccine to your members. We can help.

The current vaccine supplies are increasing, and each day more people are becoming eligible to receive them. However, this phased approach may be slower in some states than others.

+ NAVIGATE

Be your members' strongest support system and advocate.

And to do that, you need a clear path forward for what's next. From worksite returns to mental health and lingering questions about the virus and the vaccines, we can help you navigate the next steps. Our efforts to accelerate vaccine administration and distribution is just one key component in our comprehensive COVID-19 response.

- + **Evernorth Healthy Ways to WorkSM** addresses concerns about employee safety, especially when it comes to reopening worksites, including helping you evaluate high risk "hot spots" with COVID-19 risk analytics or equipping you with worksite clearance and screening tools.
- + We can also help you address other conditions that may be impacting your workforce, like mental health with the [Evernorth InMynd Behavioral Health Care solution](#).
- + [Guidelines for Working During COVID-19](#) is a great resource to address broader health and safety concerns.

TOGETHER, WE CAN ALL

BE A COMMUNITY OF IMMUNITY

Don't forget, we'll be providing you with more materials to help spread the vaccine, not the virus: Communication toolkits, including education on the vaccines, motivation to get vaccinated and of course, continued support for anything you need to help everyone move forward. Contact your account representative if you have any questions about this guide or other COVID-19-related support you need.
